audio applications, the LS1021A processor includes support for both ASRC® and SPDF. For industrial applications, the processor provides four CAN ports and up to 10 UARTS to support industrial protocols. In addition, Serial IO includes three I²C and two SPI interfaces.

COMPLETE ENABLEMENT, RICH ECOSYSTEM

For customer evaluation, the QorIQ LS1021A processor is supported by the TWR-LS1021A development platform, based on the modular Tower® System, and features an integrated on-board probe for further cost savings. The TWR-LS1021A evaluation kit includes a Linux® 3.12 SDK with optimized drivers and a free 90 day evaluation license for the CodeWarrior development studio supporting ARM development tools.

All QorIQ LS series devices are supported by our extensive third-party ecosystem. In conjunction with our expertise and worldwide support infrastructure, the ecosystem helps customers accelerate their migration from both competitive solutions and from legacy devices, preserve investment costs and reduce time to market.

## CODEWARRIOR DEVELOPMENT SUITES FOR NETWORKED APPLICATIONS

LS Tower Suite Level

This suite was created to give you an economic, yet complete full-featured development tool for QorIQ LS development when the LS part is in a Tower Board configuration. The tools in this suite have no limitations other than they will only work with the Tower Board.

Developer Suite Level

This suite is the primary suite for customers who develop with multicore processors built on Power Architecture® including, QorIQ LS series devices and QorIQ Qonverge SoCs as well as DSPs based on StarCore technology. It is for

QorLQ LS1021A PROCESSOR BLOCK DIAGRAM

designers with full system responsibility but no need for the extra costs of the specialist and architect features.

Specialists Suite Level

This suite is designed so you can do more than just compile and debug. Tools in this suite are useful for customers creating products for every market. Get all the software included in the Developer Suite plus additional board-analysis tools. These tools can be used by all customers in any market but not everyone in a customer's organization needs these tools.

Architect Suite Level

This suite would best be used by personnel who have a need to dig deep into the networking aspects of a development project. In this suite, you will get all the software in the Specialist Suite plus software tools designed to give networking experts the extra capability to find out how their system is really working.

QorIQ LS1021A PROCESSOR FEATURES

Dual ARM Cortex-A7 cores	Power efficiency, engineered to deliver over 7,000 CoreMarks. Typical total system power of 3 W for improved performance without increased power utilization.
ECC-protected L1 and L2 cache memories	The QorIQ LS1 family devices are the only processors in their class with ECCprotected caches and coherent 512 KB L2, adding performance and meeting networking requirements for high reliability.
Integrated security engine, (SEC 5.5)	High speed security protocol processing, including IPsec, SSL, DTLS, and IKE.
Rich connectivity and peripheral features, including PCI Express Gen 2, USB 3.0, SATA 3, IFC, QuadSPI, CAN	High versatility that enables support for 802.11ac modules and high bandwidth connectivity for ASICs, 4G/LTE, SATA and low-cost NAND/NOR Flash
LCD controller (2D-ACE)	Touchscreen support adds integrated HMI featured for enhanced ease of use and BOM savings. Similar IP as Vybrid controller solutions and i.MX applications processors to allow for simple software migration.
QUICC Engine)	Proven support required for industrial, building and factory protocols such as PROFIBUS, HDLC and TDM
Support for hardware-based virtualization	Enables partitioning of physical and virtual resources on LS1021A multicore parts for increased system flexibility
DDR3L/4	First in its class to offer support for DDR4 memory, ensuring continued performance efficiency
