

### Technical Specifications

Operating voltage	1.62V to 3.6V
Directivity	Omni-directional
SNR	63dB
Power Supply Rejection	-73dBFS
Sensitivity	-26dBFS $\pm$ 1
Flat Frequency Response ( $\pm$ 5dB)	50Hz to 14kHz
Current Consumption (with no load, typ.)	5 $\mu$ A (clock off) 800 $\mu$ A (clock on)
Power up Initialization	25ms (max)
Port Location	Bottom
Package Dimensions	4.0 x 3.0 x 1.0mm <sup>3</sup>

### Akustica Advantages

**Multiple MEMS Technologies:** With Akustica's patented single-chip CMOS MEMS technology and Bosch's world-renowned two-chip MEMS technology, Akustica is the only vendor to supply high volumes of MEMS microphones leveraging two unique technology platforms. Thus, Akustica is ideally positioned as a development partner for next generation products that meet the strict size and performance requirements of the most demanding consumer electronics device manufacturers.

**In-house Design and Manufacturing:** Utilizing patented MEMS technology and over two decades of research and development, Akustica maintains complete product knowledge by designing 100% of our MEMS microphones in-house. In addition, Akustica is the only MEMS microphone supplier to offer the security of in-house MEMS manufacturing via Bosch's state-of-the-art wafer fab in Reutlingen, Germany.

**Applications Expertise:** The performance of modern microphone systems is heavily dependent on the overall platform design, including software algorithms, mechanical layout and hardware implementation. As an innovator in the field of MEMS microphones and leveraging significant Consumer Electronics application experience, Akustica has a deep understanding of acoustic design requirements and proper analysis methods. To ensure our customers a seamless integration experience and support constrained design cycles, Akustica offers acoustic design and modelling services prior to assembly. Akustica also provides production test services, training, and test equipment to help ensure the quality of both incoming and final assembled products.

### Typical Frequency Response

### About Akustica – Bosch Group

Akustica was founded in 2001 to develop and market a complete portfolio of digital and analog microphones using the unique and patented CMOS MEMS technology developed at Carnegie Mellon University. In 2009, Akustica was acquired by, and is now a wholly owned subsidiary of, Robert Bosch North America. As part of the Bosch Group, Akustica joins a family of companies with combined annual sales over \$70 billion and a footprint of 300,000 associates worldwide.

Bosch has been active in the field of MEMS since 1988 and is one of the pioneers in microsystem-technology. Bosch serves both the automotive and consumer electronics markets with a wide variety of MEMS products, including pressure sensors, accelerometers and gyroscopes. With more than four billion MEMS sensors shipped worldwide, Bosch is one of the world's leading suppliers of MEMS sensors.

### Ordering information

Part Number	AKU441
Description	Digital MEMS Microphone
Package	5 Pad LGA
Shipping Method	13" Reel
Standard Quantity	5,700

Please contact Akustica for further information.
